**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 15 July 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

The applicant is requested to cancel claims 10-16 accordance with the selection of 7/15/2002.

### ***Specification***

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Rejection***

#### ***Claim Rejections - 35 USC § 112***

Claims 4-7 and 20-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction or clarification is required.

In claim 4, it is unclear what the "delay qualities" are. The same is true for claims 5-7 and 20-22.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2816

Claims 1-3, 7, 9 and 17-19 are rejected under 35 USC 102 (e) as being anticipated by Shibayama (US 6,111,448).

As the best construed, Figures 1, 10 and 13 of Shibayama discloses a DLL circuit comprising a delay line (12a, 13), a phase detector (12b) and a controller (12c).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6, 8, 20-22 are rejected under 35 USC 103 (a) as being unpatentable over Shibayama (US 6,111,448).

Figures 10 and 13 of Shibayama discloses a DLL with all of the limitations of the claimed invention but does not disclose that, i.e., the delay elements having substantially a same delay quality or a different delay quality. However, as understood by a person skill in the art, the delay elements (13a-13j) of Shibayama can be selectable to provide different delay times depending upon an application. Thus, selecting the delay elements is a common practice for an engineer and is considered to be a matter of a design expedient for the engineer. Lacking of showing any criticality, a skilled artisan would have been obvious to select the delay time of the delay elements of Shibayama for the purpose of accommodating with a selected system.
